# Burnett's Lawn Grass Seed Mixtures

Lawn View of Private Estate Sown with Burnett's "Special" Lawn Grass Seed Mixture.

## Burnett's "Special" Lawn Grass Mixture

The above mixture is made from our own formula, and composed of grasses specially adapted for the purposes of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable dwarf evergreen, recleaned grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn.

1 lb., 60c., 2½ lbs., \$1.40, 5 lbs., \$2.75, 10 lbs., \$5.00, 20 lbs., \$9.50, 100 lbs., \$45.00  
(20 lbs. of Burnett's "Special Mixture" is approximately one bushel.)

## Burnett's "Killarney" Mixture

Burnett's Lawn Grass Seed Mixture "Killarney" is composed of a combination of the finest Imported and Domestic grasses, the highest grades possible to procure, and specially adapted for this climate. This mixture is composed of all solid, recleaned seeds of the highest germination. Therefore, owners of large estates requiring a permanent sod and everlasting lawn should by all means use this high-grade mixture. If the ground is properly prepared, we are certain "Killarney Mixture" will produce a turf of velvet, equal to the most famous Lawns in Europe. Give it a trial. "Sow Killarney and walk on Velvet."

1 lb., 65c., 2½ lbs., \$1.55, 5 lbs., \$3.00, 12½ lbs., \$7.25, 25 lbs., \$14.00, 100 lbs., \$55.00  
(25 lbs. of "Killarney Mixture" is approximately one bushel.)

## Burnett's "Central Park" Mixture

This well-known mixture contains a large proportion of permanent grasses that grow quickly, producing a rich, green sward in about four weeks from time of sowing.

1 lb., 50c., 2½ lbs., \$1.20, 5 lbs., \$2.35, 10 lbs., \$4.50, 20 lbs., \$8.50, 100 lbs., \$40.00  
(20 lbs. of "Central Park Mixture" is approximately one bushel)

We recommend sowing 150 lbs. to the acre, 1 lb. to 200 square feet.

**Note:** To destroy worms in your lawn, use Electric Worm Eradicator. (See page 104.)

# Burnett's Lawn Grass Seed Mixtures

View showing Lawn sown with Burnett's "SHADY PLACE" Lawn Grass Seed Mixture.

## Burnett's "Shady Place" Mixture

When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with Burnett's "Shady Place" Lawn Grass Seed Mixture, which is a combination of fine, dwarf-growing evergreen varieties, which, in their wild or natural state, are to be found growing in the woods or other sheltered or shady places. Under or in the immediate neighborhood of large trees fertilizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases an application of lime or wood ashes raked in will sweeten the soil, but the moss should be first removed with a sharp steel-toothed rake.

1 lb., 70c., 2½ lbs., \$1.65, 5 lbs., \$3.25, 10 lbs., \$6.40, 20 lbs., \$12.50, 100 lbs., \$60.00  
(20 lbs. of Burnett's "Shady Place Mixture" is approximately one bushel.)

## Burnett's "Bank and Terrace" Mixture

On sloping banks it is often necessary to use sod, as heavy rains wash the soil off before the grass seed has time to germinate. It is sometimes even necessary, in sodding very steep banks, to use pins eight or ten inches in length to pin the sods in place, to prevent them from being washed down by excessive rains before the grass roots have had time to fasten in the soil. The Terrace mixture which we offer is composed of deep-rooting grasses which, if once established, will hold the soil and prevent washing, and we advise liberal fertilizer and seeding so that the grasses may be quickly established.

1 lb., 70c., 2½ lbs., \$1.65, 5 lbs., \$3.25, 10 lbs., \$6.40, 20 lbs., \$12.50, 100 lbs., \$60.00  
(20 lbs. of Burnett's "Bank and Terrace Mixture" is approximately one bushel.)

## Burnett's "Bentmix" Lawn Seed

A specially mixed formula that includes several of the finest bent grasses, together with such other fine leaved grasses required to obtain that "Putting Green" effect that is becoming more popular each year and yet able to withstand the hard usage to which most lawns are subject.

5 lbs., \$4.75, 10 lbs., \$9.00, 20 lbs., \$17.50, 100 lbs., \$80.00  
(20 lbs. of Burnett's "Bentmix" Lawn Seed is approximately one bushel.)

We recommend sowing 150 lbs. to the acre, 1 lb. to 200 square feet.

# BURNETT'S GRASSES AND CLOVERS

## Hay, Meadow and Permanent Pasture Mixtures

**O**UR Permanent Pasture, Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food supply for stock. Our formulas are arranged with great care and the mixtures are made to suit the exact location and condition of soil, etc., for which they are needed.

Nothing but the best re-cleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown.

We recommend four bushels to one acre, which may be sown either in the Spring or Fall, with an additional ten pounds of Mixed Clovers sown early in the Spring. When ordering please state whether for high, dry, medium, wet or heavy soil.
